IN THE SPOTLIGHT

Most men, on one occasion or another, have had attention focused upon them, at least for a brief moment. There are some who are under critical observation a good part of the time whether they like or not. Many people, however, have sulked in corners when the limelight has been turned in the direction of others. They suffer from not knowing what to do about it. For such tortured souls I venture to suggest the remedy prescribed by a late famed baritone of the Metropolitan Opera and a dearly beloved concert singer, whose magic voice still lingers in the memory of many an American music lover.

Our star came upon the stage in all the majesty of a great singer, cast in the Wagnerian role of Wotan. Waiting for the spotlight which was being manipulated by a nervous stage hand, high in the wings, he saw it hover for a moment and then descend upon the startled features of a minor member of the cast. Still he waited for the light, his lines unuttered. Then, as it floated from one actor to another, his great voice bellowed, "On me, you fool, on me!"

Softly the light came to rest on David Bispham's face and Wotan spoke.
